## **Appendix B: Engaged Local Coordination Partners**

The Division of Broadband and Digital Equity partners with organizations from the following sectors across the state to explore the needs and opportunities for expanding high-speed internet to all North Carolina communities: internet service providers, telephone and electric membership cooperatives, universities, community colleges, K-12 institutions, computer refurbishment agencies, digital navigator programs, libraries, nonprofits, and many others.

The division appreciates the N.C. Association of County Commissioners and the N.C. League of Municipalities for co-hosting the Closing the Digital Divide: Internet for All in NC summit event and helping the state collect feedback from its many constituents.

The division also expresses gratitude for the following stakeholders that participated and provided feedback during listening sessions across the state:
